

AUKUS & THE DEFENCE PLAN

# THE WRONG WAR PLAN

Hormuz proved a blockade of our tankers can't be broken by the Navy – least of all by submarines. Review the plan before we build it.

## WHY THE PLAN NEEDS REVIEW

### 01 THE WRONG WAR

The plan answers an invasion. The real risk is a blockade no fleet or submarine can lift.

### 02 PROVEN AT HORMUZ

In 2026 a blockaded strait stayed shut for months – even after the blockading navy was destroyed.

### 03 NO FUEL, NO FOOD

We import ~90% of our fuel with ~30 days' cover. Cut the lanes and the pumps, then the shelves, run dry.

#### STRAIT OF HORMUZ

CLOSURE · 2026

- Iran shut the strait, February 2026
- ~20% of world seaborne oil halted
- Navy sunk in 72h – lane never reopened
- Pentagon: ~6 months to clear, post-war

#### THE AUKUS BET

2023 – 2055

- \$368 billion committed to 2055
- No submarine before the early 2030s
- Transfer needs US sign-off to proceed
- Three subs can't lift a blockade

## NO FUEL, NO FOOD, STARVATION, SURRENDER

**~30 days**

fuel cover if lanes close

**~90%**

of our fuel imported

**\$368B**

AUKUS, to 2055

**0 subs**

before the 2030s

## AND NO SUBMARINE CAN LIFT A BLOCKADE.

Review the defence plan before another dollar is spent.

## RISE UP. SPEAK UP. A ROYAL COMMISSION NOW.

Then redirect the spend to rebuild the nation – better energy, transport, independence from external shocks.
